BandwidthX Named to the GSMA 100

*Mobile Operators from around the world selected
BandwidthX as a growth leader in 5G and networking.*

CARLSBAD, Calif. – The [GSMA](#) has named [BandwidthX](#) to the 'GSMA 100', a global innovation discovery initiative designed to identify the world's most promising growth-stage companies and advance the next generation of connectivity and digital services. GSMA 100 is part of the GSMA's innovation portfolio and aims to stimulate new value by connecting growth stage companies with mobile operator executives.

"We welcome BandwidthX to the GSMA 100. The GSMA 100 are leaders in growth categories poised to drive digital transformation and innovation in the mobile marketplace," said Laxmi Akkaraju, Chief Strategy Officer, GSMA. "We look forward to working with BandwidthX to champion their success by unlocking new doors for business development and investment across the mobile industry."

"BandwidthX is very pleased to join the GSMA 100. We have an innovative solution that brings dramatic savings and performance improvements in LTE and 5G networks to the global mobile industry," says BandwidthX CEO Mike Kleiman. "We look forward to sharing our transformative approach with GSMA community."

BandwidthX carrier-neutral exchange platforms employ idle data capacity across mobile network boundaries. The solutions automatically reach across network boundaries to better redistribute load and improve connection quality. They create tremendous cost savings while improving network performance, coverage, and subscriber experience.

The GSMA 100 represents the innovation priorities of mobile operators around the world. The selected companies are nominated by GSMA operator members, ecosystem partners and leading technology investors. BandwidthX joins the third cohort of the GSMA 100 companies, which also includes: [ChipperCash](#), [FirstPoint](#), [Forward Networks](#), [Juvo](#), [AlefEdge](#), [Volterra](#), [Cellwize](#), and [Altiostar Networks](#).

About the GSMA

The GSMA represents the interests of mobile operators worldwide, uniting more than 750 operators with over 350 companies in the broader mobile ecosystem, including handset and device makers, software companies, equipment providers and internet companies, as well as organisations in adjacent industry sectors. The GSMA also produces the industry-leading MWC events held annually in Barcelona, Los Angeles and Shanghai, as well as the Mobile 360 Series of regional conferences.

For more information, please visit the GSMA corporate website at www.gsma.com. Follow the GSMA on Twitter: [@GSMA](https://twitter.com/GSMA).

About BandwidthX

BandwidthX provides carrier-neutral exchange platforms that put idle mobile capacity to work across ownership boundaries. The solutions extend the capacity and coverage of data networks, creates CAPEX and OPEX savings, and enhances network performance for mobile subscribers. The company's initial business was based on Wi-Fi capacity with tens of millions of mobile devices and access points active on its platform. Its services have grown to include cellular capacity (LTE and 5G). With BandwidthX's award winning products everyone in the mobile data ecosystem wins: from mobile and network operators to equipment and software vendors and services providers and, of course, the end users of mobile devices.
